

AC Pro 80% Single Stage Non-Variable Furnace

Ultra Low NOx Model Available

FEEL GREAT ABOUT YOUR DECISION. THEN FEEL GREAT ALL WINTER LONG

When you choose an AC Pro furnace, you're selecting a well-built, hardworking piece of equipment that's designed to be rugged and reliable season after season. That's what makes it the right choice.

LOOK INSIDE THE RUGGED, HARDWORKING FURNACE

Efficiency
An 80% AFUE* means the furnace converts a full 80% of the fuel it consumes into usable heat. That can help you spend less on energy every month.

Dependability
A 10-year limited warranty on parts and a limited lifetime warranty on the heat exchanger (with registration)** mean lasting comfort and peace of mind.

Durability
The aluminized steel heat exchanger resists corrosion, and is crimped instead of welded for long life and safety.

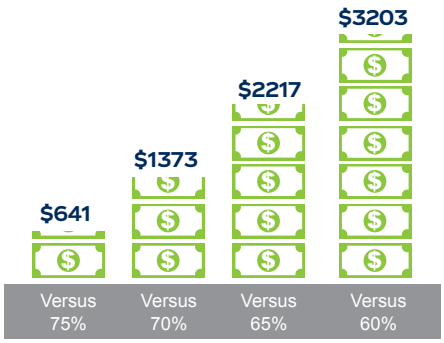
The anti-vibration blower assembly helps reduce noise during startup and shutdown for peaceful, quiet operation.

Every furnace is started and operated at the factory to ensure it performs as expected and provides the highest level of durability.

* Like the miles-per-gallon rating on your automobile, the higher the AFUE rating, the lower your fuel costs. All furnaces manufactured today must meet minimum AFUE requirements. If your furnace is 10-15 years old, it probably falls below the current minimum and wastes energy

** Applies to residential applications only. For terms, conditions and exclusions, see full warranty at acpro.com.

Over the years, a hardworking AC Pro furnace can save you hundreds of dollars on utility bills



Savings vary depending on use, geography, lifestyle, maintenance, installation ad other factors. Chart depicts 5-year savings over less-efficient models.
